

HIGH CLOSE SURVEY 2009

		Code: B = Bank E = Enclosure L = Lynchet M = Mound P = Platform W = Boundary Wall						
Ref	Code	Description	Dimensions (mts)			GPS (12 fig)	Ref	Map
101	B	Curvilinear earth bank with exposed limestone extends to boulder 136 (<i>not as AP</i>)						
102	B	Large curvilinear earth bank with exposed limestone (<i>with kink near boundary wall, not on AP</i>)						
103	B	Large curvilinear earth bank with exposed limestone - abutts 102						
104	B	Curvilinear earth bank with exposed limestone - abutts 102 (<i>Shown as linear on AP</i>)						
105	B	Curvilinear earth bank with exposed limestone - <i>not on AP</i>						*
106	B	Linear earth bank with exposed limestone - abutting 102 then turning NE to abutt 110						
107	B	Curvilinear earth bank with some exposed limestone. Natural break of slope to E. Turns NE - then linear - slight break of slope to E - abutts 110						
109	B	Linear earth bank with exposed limestone abutts 107. <i>Does not appear to continue through BW as per AP</i>						
110	B	Curvilinear earth bank with exposed limestone (<i>not linear as AP</i>) abutts 126. Less distinct at S end between 106 & 125. <i>Bank running NE outside BW is not a continuation of BW</i>						
111	B	Curvilinear line of stones abutting 126						
112	B	Sub-circular earth bank with BW running through middle. Spring fed pond? <i>Not shown on AP</i>						*
113	B	Curvilinear earth bank - ends 20m short of BW (<i>not as AP</i>)						
114	B	Linear earth bank - <i>does not appear to continue as far as modern track</i>					*	
115	B	Curvilinear earth bank with few exposed stones					*	
116	B	Indistinct earth bank					*	
117	B	Large curvilinear earth bank with exposed limestone - break of slope (lynchet?) to SE.					*	
118	B	Large linear/curvilinear earth bank with exposed stone - turns NW - abutts 113					*	
119	B	Large slightly curvilinear earth bank with break of slope (lynchet?) to SE. <i>Not parallel banks as shown on AP</i>					*	
120	B	Linear EB stops 6m short of 101 (<i>not as per AP</i>)					*	
121	B	Linear earth bank with exposed limestone					*	
122	B	Break of slope - natural?						

HIGH CLOSE SURVEY 2009

123	B	Large curvilinear earth bank with exposed limestone - break of slope (lynchet?) to W. <i>Does not continue to 102 as per AP</i>							
124	B	Low D shaped earth bank with exposed limestone. Abutts 102 and 106							
125	B	Earth bank with pronounced break of slope (lynchet?) to SE. 1st 10mts from 110 v. indistinct							
126	B	Line of stones abutting 110							
127	B	Indistinct linear earth bank with few exposed stones. Abutts 113 and mound 145							
128	B	Indistinct linear earth bank - abutts 117 & 129							
129	B	Earth bank NE/SW axis = distinct, curvilinear with exposed stone. NW/SE axis = less distinct & linear - <i>stops 3m short of 115.</i>							
130	B	Linear earth bank with break of slope (lynchet?) to SE. Abutts mound 146							
131	B	Large linear earth bank with few exposed stones - abutts 113 & 125							
132	B	Linear earth bank with exposed limestone and prominent break of slope to S. Abutts 123 & 125. <i>Turns rt. Angle at SW corner</i>							
133	B	Curvilinear earth bank with exposed limestone. Slight break of slope to SW. Abutts 113 & 119							
134	B	Linear earth bank with exposed limestone. Slight kink mid way along. Abutts 133 & 101							
135	B	Break of slope to SE (lynchet?). Abutts 101 and mound 148							
200	B	Defines terrace edge, steeper bank towards lower ground on SW side							
203	B	Low, wide isolated linear feature							
205	B	Linear feature - wide and low containing some larger stones (diameter - 0.5m). Spread of tumble is wide at higher, SE end. Feature is broken by a gap with an adjacent mound of stones (ref '209')							
206	B	Linear feature with small mound or cairn at Eastern end (ref '207')							
212	B	Very faint linear feature following natural line of top of slope							
217	B	Linear earthwork - boundary?							
218	B	Boundary? following natural (?) bank top. Large boulders have tumbled down slope on Eastern side. Small break in '218' where '217' joins'							
219	B	Point where linear feature '218' becomes very indistinct.							

HIGH CLOSE SURVEY 2009

221	B	Linear feature not connected to '220' as shown on map. Gap of approx 8m. '221' is not very distinct. Has a spread of tumble over 2 or 3m. Extends further to the Southeast than map indicates.							√
224	B	Substantial linear and curving feature with wide area of tumble							
227	B	Linear feature crossed at western end by modern track							
230	B	Junction of linear features. Gap as shown on map not seen on the ground							√
231	B	Wide, substantial linear feature which includes curves along its length. Other adjacent, straight embankments respect this feature							
232	B	Junction of '231' and high, wide wall to Northeast of '225' enclosure							
233	B	Short spur forming an acute angled corner with '231'							
235	B	Linear feature broken up by two intersecting modern tracks							
241	B	Embankment lying east of large cairn. Northern end has a row of large stones forming a curving 'edge'							√
250	B	Linear feature - well defined embankment							
271	B	Stony bank running SE-NW at 90° from hollow-way - wall line not very clear on the ground at SE end. Wall ends short of wall 273, leaving gap - see 272							
301	B	Snaking bank running from area of boulder curve							
304	B	Junction of banks not clear on map							*
311	B	2 sections of indistinct banking							
317	B	Complex enclosure feature and banks							
326	B	Linear bank running n/e							
327	B	Linear bank running n/e							
328	B	Linear bank running n/e							
329	B	Linear bank running n/w							
330	B	Linear bank running n/e							
331	B	Linear bank running n/e							
332	B	Linear bank running n/e adjacent to quarry/kiln							
333	B	Linear bank running n/e							
335	B	Erratic bank running n/e from triangular enclosure							
338	B	Erratic bank running n/w in enclosure 337							
408	B	Rounded earth and stone linear bank which continues beyond the boundary wall.	5m		0.5m				

HIGH CLOSE SURVEY 2009

414	B	Low rounded earth and stone linear bank fades out just short of 415,not as shown on AP map.	1.5m						
419	B	Rounded earth and stone linear bank which is robbed out next wall 405 but does appear to continue beyond it. There is a break NE of it's interface with lynchet 415 and there are more visible stones in the length which bounds enclosure 421	4m		0.5-1.5m				
423	B	Earth and stone linear bank with flattish top higher towards the NW end	5m		1-1.5m				
424	B	Earth and stone linear bank in line with 414 and forming a corner with 423 which possibly overlies it Bank 424 abuts lynchet 427.	5m		1-1.5m				
429	B	Rounded earth and stone bank abuts 427, not as map.	7m		1m				
432	B	Rounded earth and stone bank, probably an extension of 434.It abuts the end of lynchet 427.Bank 423 appears to overlie it.	5m		1m				
434	B	Wide well rounded earth and stone linear bank which continues beyond wall 405 but has been robbed out either side of it. There is a small tractor track break along it's length and a larger break for a modern track at the eastern end	6m		0.5-1.0m				
439	B	Low rounded earth and stone linear bank curving slightly to the north at it's eastern end	1m		0.5m				
443	B	Earth and stone bank bordering the eastern side of track way 433	5m		0.5m				
459	B	Broad earth and stone linear bank with a flattish top which appears to extend lynchet 454	5m		0.75m
